Exacerbating inequality over the life-course: Examining race differences in the reciprocal effects between incarceration and income.

Table of Contents:

Appendix A: Full Results of Model Presented in Primary Text
Appendix B: Replication of Primary Model with Income as Percentage Change from Previous Year
Appendix C: Replication of Primary Model with Income as Percentile Rank
Appendix D: Replication of Models in Literature Using the NLSY97 with Yearly Incarcerated Measures Dichotomized ("0" = Not Incarcerated in a Specified Year; "1" = Incarcerated in a Specified Year)
Appendix E: Replication of Models in Literature Using the NLSY97 with Months Incarcerated

Appendix A: Full Results of Model Presented in Primary Text

Table A1: Full LCM-SR results of the association between months incarcerated and income.

N	3,993						1,925					

Notes: Models were estimated using the DLS estimator and the multi-group function in Lavaan. The multi-group estimation of these models permits the estimates to be directly compared as the estimation procedure was conducted simultaneously.

Appendix D: Replication of Models in Literature Using the NLSY97 with Yearly Incarcerated Measures Dichotomized ("0" = Not Incarcerated in a Specified Year; "1" = Incarcerated in a Specified Year).

Table D1: Total Income in the Specified Year Regressed on Incarcerated for White and Black Individuals in the NLSY97.

Notes: Models were estimated using the DLS estimator and the Multi-group function in Lavaan. The multi-group estimation of these models permits the estimates to be directly compared as the estimation procedure was conducted simultaneously.
